Alberto Estrada Gómez

Software Engineer · Full-Stack

Málaga, Spain · albertoestradag19@gmail.com · LinkedIn · github.com/albertoesgo

Software engineer who builds complete products: design, development and deployment. I run my own apps in production, build websites for clients, and bring hands-on experience in applied AI and business process automation.

EXPERIENCE

AI & Process Automation Engineer · MicroCAD Informática — Sep 2026 – Present

- Early member of the new AI & Automation department: first solutions shipped in **under 2 months**.
- Automate processes with **Power Automate** and Python; integrate external APIs with **SharePoint** and in-house apps.
- Build internal apps and **Power BI** reports for teams across the company.
- Work with management, cloud, cybersecurity, IT and sales teams to scope each solution.

Software Developer Intern · Babel — Nov 2025 – May 2026

- End-to-end modernisation of a full business management system: relational data model and business logic on **Oracle APEX** and **OutSystems ODC**.
- Migrated a legacy architecture to low-code, automated business processes and built AI proofs of concept.

PROJECTS

LOOKIT · Spanish fashion aggregator — 2026

Personal product · live · lookit.es

- Unifies the catalogues of **24 Spanish brands** (9,000+ products) from their Shopify stores and sends shoppers to each official site; the catalogue is rebuilt every hour.
- Natural-language search: a custom parser, with an LLM (Gemini) as fallback only when a query isn't understood.
- Account-free alerts for drops, price cuts and restocks via push (PWA) or email, with encrypted data (AES-256-GCM). Next.js, TypeScript, Redis, Vercel.
- Social content generated from code (Remotion, AI background removal, Whisper-aligned voiceover).

Client websites — 2026

Freelance · design, build and deployment

- **luciagascon.es**: a painter's portfolio with a walkable 3D gallery (**three.js**) and a custom admin panel (Cloudflare Pages, Functions and KV).
- **wildcamper.es**: van conversion, sales and rentals, with catalogue, booking calendar, admin panel with auth and RLS (**Supabase**) and an offline PWA.

DeTemporada · seasonal food by region — 2026

Personal product · PWA

- What's in season in each Spanish region: **210 products** with prices and recipes, and **451 local shops** on a map. Client-side and offline.

AquaAndalucía · AI forecasting of reservoir levels — 2025 – 2026

Bachelor's thesis · University of Málaga

- Compared **11 models** (statistical, ML and deep learning in PyTorch) trained on the Picasso supercomputer, served via **FastAPI** in a **React/TypeScript** app with what-if simulation.

EDUCATION

BSc in Computer Engineering · Computing major · University of Málaga — 2021 – 2026

Erasmus+ · Computer Science · Gdańsk University of Technology (Poland) · taught in English — 2024 – 2025

SKILLS

Frontend	TypeScript, React, Next.js, Angular, Tailwind CSS, three.js, PWA
Backend & APIs	FastAPI, Node.js, Express, REST, SQL (Oracle, PostgreSQL, SQLite), Supabase, Redis, Java, C++
Cloud & DevOps	Cloudflare (Pages, Workers, KV), Vercel, GitHub Actions, Git, HPC (Picasso)
AI & data	Python, PyTorch, scikit-learn, XGBoost, pandas, statsmodels, LLMs (OpenAI, Gemini), KNIME
Automation	Power Automate, Power BI, SharePoint, Oracle APEX, OutSystems ODC
Languages	Spanish (native) · English (C1)
Volunteering	Erasmus Student Network (2026 – present) · Fundación Madre Coraje (2025)
