Alberto Estrada Gómez

AI & Process Automation Engineer

Málaga, Spain · albertoestradag19@gmail.com · LinkedIn · github.com/albertoesgo

AI & automation engineer on the founding team of MicroCAD's AI department: I design end-to-end automations (Power Automate, Python, APIs) and internal apps that remove manual work, bridging business and technology. Strong foundation in machine learning and web products.

EXPERIENCE

AI & Process Automation Engineer · MicroCAD Informática — Sep 2026 – Present

- **Founding team** of the AI & Automation department: first solutions delivered in **under 2 months**.
- End-to-end automations with **Power Automate** and Python, integrating third-party APIs with **SharePoint** and internal apps.
- Internal applications and **Power BI** dashboards for management and business teams.
- Bridge business and tech with management, cloud, cybersecurity, IT and sales teams; take part in client meetings.

Software Developer Intern · Babel — Nov 2025 – May 2026

- Modernised a business management system (data model and logic) with **Oracle APEX** and **OutSystems ODC**.
- Migrated legacy architecture to low-code, automated processes and built AI proofs of concept.

PROJECTS

Bachelor's thesis · AI forecasting of reservoir levels — 2025 – 2026

BSc in Computer Engineering · University of Málaga

- Benchmarked **11 models** (ARIMA/Prophet, RF/XGBoost, attention LSTM, transfer learning and a graph-based GCN-LSTM) trained on the **Picasso** supercomputer.
- Multi-horizon evaluation against a persistence baseline: at 30 days the multivariate LSTM **halves the error** (RMSE 5.7 vs 12.0 pp) and at 60 days holds NSE at 0.70 while the baseline drops to 0.07.
- Three-tier system (**FastAPI** + PyTorch, **React/TypeScript**) with a 90-day what-if simulator and an LLM assistant.

LOOKIT · Spanish fashion aggregator — 2026

Personal product · live · lookit.es

- **24 brands** and **9,000+ products** unified from Shopify: concurrent ingestion, per-store caching, hourly ISR.
- Custom natural-language search (brand, item, colour, size, price) with Gemini only as a fallback.
- Account-free push and email alerts: HMAC keys, **AES-256-GCM** encryption, double opt-in. Next.js 16, Redis, Vercel.

Client websites — 2026

Freelance · design, build and deployment

- **luciagascon.es**: real-scale 3D gallery in **three.js**, on-demand loading and a serverless CMS on Cloudflare.
- **wildcamper.es**: van sales, rentals and bookings; fully editable admin, **Supabase** Auth + RLS and a PWA.

Also: DeTemporada: offline-first PWA with 210 seasonal products and 451 geolocated local shops.

EDUCATION

BSc in Computer Engineering · Computing major · University of Málaga — 2021 – 2026

Erasmus+ · Computer Science · Gdańsk University of Technology (Poland) · taught in English — 2024 – 2025

SKILLS

Backend & APIs	FastAPI, Node.js, Express, REST, SQL (Oracle, PostgreSQL, SQLite), Supabase, Redis, Java, C++
AI & data	Python, PyTorch (LSTM, GNN), scikit-learn, XGBoost, pandas, statsmodels, LLMs (OpenAI, Gemini)
Automation	Power Automate, Power BI, SharePoint, API integrations, Oracle APEX, OutSystems ODC
Cloud & DevOps	Cloudflare (Pages, Workers, KV), Vercel, GitHub Actions, Git, HPC (Picasso)
Frontend	TypeScript, React, Next.js, Angular, Tailwind CSS, three.js, PWA
Languages	Spanish (native) · English (C1)
Volunteering	Erasmus Student Network (2026 – present) · Fundación Madre Coraje (2025)
